ASHLEY TRIO+ BEZEL[™]

POWER AND DATA UNLEASHED

Developed to bring a palpable charge to any space in the office, the Ashley Trio+ Bezel is ideal for organizations and people who collaborate wherever inspiration takes them. Make sure the devices needed to capture, transmit and record great ideas have the power and data support embedded in your creative havens.

ASHLEY TRIO+ BEZEL™

POWER TO THE PEOPLE

Bringing extended capabilities and uninterrupted connection away from the traditional workspaces, the multi-user-friendly Trio+ Bezel includes three AC outlets and a state-of-the-art dual USB port. The dual 2.1 amp USB port utilizes a circuit controller to independently deliver the required amperage to your devices—up to 2.1 amps each—and charge them in a fraction of the time it takes with similar products on the market.

Ashley Trio+ is UL and FCC Part 15B approved.

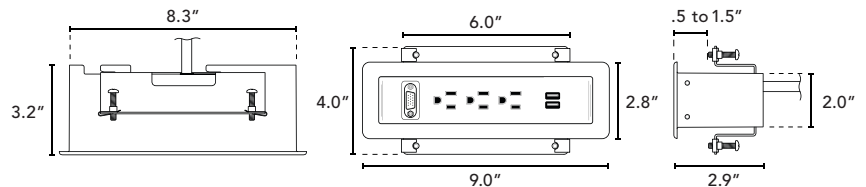

DELVE INTO THE DATA

Building on the premium power offering, the Trio+ Bezel presents a space for your choice of HDMI, RJ45 and VGA ports to meet your data and A/V connection needs.

MAKE YOUR MARK

The Ashley Trio+ Bezel, part of the 2014 Powered by Pent Collection, can impress like any other tony accessory. Always available in classic monochromatic black and white, or white with silver satin bezel, along with custom colors to make your space stand out.

The frame not only augments the power and data cluster, but allows it to be mounted where it makes the most impact—embedded in furniture or on any vertical surface.
