

MARINA™ HDMI

**MARINA™ HDMI PROVIDES:**

**Flexibility of Design**

Marina™ HDMI can be used across a variety of furniture lines in both new and retrofit applications.

**Integral Cable Management**

Recessed storage compartment provides ample space for cabling when not in use, keeping the workspace clutter free and any adapters stored.

**Flexibility in Design**

All components are stored in a technology bay which is easily affixed to the underside of the table. A separate grommet with sliding doors is dropped in from the top and available in a variety of finishes — or be creative and design your own.

**Easy Set-Up**

Once installed in the table, simply connect the Marina into a power source and monitor, and you are ready to share. No additional software installation is required.

**ETL Listed for US and Canada**

**ALL INCLUSIVE COLLAB**

**COLLABORATIVE MEETING TECHNOLOGY**

Collaborate with a push of a button. The Marina HDMI audio-visual solution allows up to four users to share ideas on a single screen. Sliding doors offer easy access to power, optional data capabilities, and USB charge ports to keep devices charged, even while in use. Because Marina is a non-proprietary solution, it can be integrated into any furnishing option, whether new or a retrofit.
