

CONCEPT™

RESOURCEFUL POP-UP POWER

DISCRETE TABLETOP POWER SOLUTION

Designed to discretely hide beneath a work surface or counter top, Concept delivers power and data on your demand. A simple press of the lid raises or lowers power access to and from the table surface. Sleek and small in frame, Concept is packed with four power receptacles and two telecom plate knockouts evenly distributed on two sides for optimal sharing access. Decorative lids and trim kits, available as options, allow for both a square or round design and are available in a variety of finishes. Prefer your own design? Fabricate your own tops to match the veneer of your table.

FEATURES:

Applications

In-Surface
On-Surface
