

COVE™ MINI

PRIMITIVE POWER

RETROFIT CAPABILITIES

Cove™ Mini is an integral power and charging component designed to easily retrofit into many manufacturers standard 3.27" x 1.9" cutouts. Some of these include Global Total Office, Group Lacasse and Steelcase 9000 products. Spill resistant power receptacles and a unique "spill-safe" coating enclose the USB circuit board, protecting against electrical damage in the event of an unexpected spill. This special feature provides the worry-free freedom to mount the unit face up in surfaces. Round and rectangular faceplates offer you multiple options for customizing your work surface.

FEATURES:

Applications

In-surface/tabletop

Standard Finishes

- Silver Pearl
