

REEF™

MODERNIZE THE WORK SPACE

CONFERENCE ROOM POWER SOLUTIONS

Sometimes, sleeker is better. Modeled after our Oasis Mini, Reef integrates multiple 120 Volt power receptacles along with advanced USB and data capabilities to keep devices charged and accessible, and your day running seamlessly. Better indeed.

REEF™ PROVIDES:

Soft & Effortless Lid-Closer Design

Dampened door design adds a soft touch when opening the lid and disappears into the furniture allowing easy access to all components inside the unit. Integrated brush trim helps keep debris from entering the unit and allows cords to exit the unit, even when the door is closed.

Enhanced USB Technology

Powerful 2.1 AMP USB's are coated and water resistant for protection against spills and can charge higher power devices such as tablets even when in use.

DaisyLink System Compatibility

Connect multiple units together from one power infeed. This system is ideal for installing multiple units within a table.

Individualized Customization

Various configurations and finish options allow you to select which unit is best for your application.
