

DISCOVER WHICH DEVICES HAVE WIRELESS CHARGING CAPABILITIES

There are over 140 handsets and other devices from more than 40 manufacturers which have wireless charging capabilities built-in, the majority of which use the Qi wireless charging standard. Wireless charging looks set to increase to include over 50% of all handsets by 2022.

For devices not yet compatible with the Qi technology, ECA offers a Wireless Charging Receiver with hard connections allowing the AirCharge unit to adapt to most common devices on the market today.

For a complete list of Qi-compatible devices, click [here](#).
