

FLC-2000

Charging beyond the norm.

FULLY LOADED, ALL-IN-ONE POWER SOLUTION WITH A SINGLE CORD TO THE WALL.

The FLC-2000 offers a streamlined, extended, power package that solves today's modern issue: too many devices, not enough charging.

Here's how it works: a clamp-on unit works alongside an undermount power solution to provide ample, efficient access to power. The clamp-on unit—with three standard receptacles, 1 USB-A port, and 1 USB-C Power Delivery port—can be applied to virtually any desk ledge. It then connects to a second power solution that mounts underneath the tabletop providing five utility outlets discreetly below the surface. Everything is connected by a single UL-listed cord, which is then plugged into the wall.
