

FLC-2000

Charging beyond the norm.

FULL LOAD CDC & ALL NOND POWER SOLUTION IN ONE SINGLE PORT TO THE WALL

The FLC-2000 offers a streamlined, extended, power package that solves today's modern issue: too many devices, not enough charging.

The FLC-2000 clamp-on unit works alongside an undermount inline solution to provide ample, efficient access to power. The clamp-on unit—with three AC receptacles, 1 USB-A charging port, and 1 USB-C Power Delivery charging port—can be applied to virtually any desk ledge. It then connects to the inline power solution that mounts underneath the tabletop. This inline solution provides five AC receptacles that run parallel to the work surface to ensure **all** of your devices are powered up.
