COVE MOUNTING CAPABILITIES

Clamp-Mount -

The Clamp mounting method requires no tools, and is best suited for installations where the back of the unit is easily accessible. The clamp mount works well for desks, benches, tables and case goods. The Cove is fastened to the furniture from the rear by tightening the thumbscrews.

Screw-Mount -

The screw mounting method is best suited to installations where the back of the unit has limited, or no access. Ideal for soft sided seating, lounge furniture and support columns. The screws are inserted from the front of the unit, through the face of the Cove, fastening the Cove to the furniture.

Convenience Outlets-

Convenience outlets are perfect for stationary accessories like lamps, computers, or monitors which do not need to be accessed often allowing more room to plug in temporary devices like laptops, tablets, and mobile phones above the work surface where they are more easily accessible.
