

POWER UP, DOWN, & ALL AROUND.

Layer™

STU  
DIO

BY DEKKO

# Better between here and there.

Layer™ gives users the freedom to find the location that's right for them and no longer need to be tied down and huddled around wall outlets and fixed power sources. This sexy, slim, free-standing power source fits perfectly between desks, nesting tables, around lounge seating, and all the areas in-between.

**LAYER PROVIDES:****Unique Freestanding Power**

Layer is categorized as a freestanding power solution—meaning it can be used in various locations without surface cutouts or product installation. Layer is ideal for offices, collaborative areas, healthcare environments, educational spaces, and much more.

**Power-Delivery (PD) Technology**

Power Delivery Technology is contained in the USB-C Power Delivery (PD) port. This technology delivers the right amount of power required to charge the connected device as fast and as safely as possible without damaging the device's battery. Power Delivery is an important feature in today's power products because it can help keep people efficiently powered and effectively connected.

**Beauty in the Details**

This product drew inspiration from modern product design highlighting clean lines, monochromatic color schemes, and utilizing various textures to create a point of interest.

**Built-in Cable Management**

Layer offers users a unique feature that most other freestanding power products lack: built-in cable management. Integrated into the base of the stand, users are able to wind the cord to their desired length, or store it cleanly when not in use.

## FEATURES:

### Applications

Freestanding

### Metal Body Finishes

White   
Carbon 

### Felt Ledge Insert Color Options

Stone Grey
