MODULAR CONNECTIVITY FOR CONFERENCING APPLICATIONS

Integrate innovative technology seamlessly within your conferencing applications using Oasis™ Mini with DaisyLink™. The non-sequential 4 wire 2 circuit electrical system allows both tabletop and under table models to daisy-chain from a single infeed; delivering centralized locations to easily access power, USB, and data. The adaptable 15-inch table trough solutions keep power capabilities, wires and cords neatly contained thanks to the retractable two-panel closure lid or Trim Pivot Kit Lid options.

BY DEKKO

In-Surface/Bezel (Featured to the right) -

• Easily integrate Oasis™ Mini tabletop unit directly into the surface cutout. This model comes standardly equipped with a clever retractable lid that keeps wires and cables organized and out of sight. When closed, the unit sits nearly flush to the surface for an overall aesthetic finish.

Under Table (UT) (Featured to the left) -

• Oasis™ Mini UT secures to the underside of the application for a completely recessed finish. When paired with the optional Trim & Lid Pivot Kits, the set of frosted glass lids flip open and closed; providing easy access to integrated technology with additional cable management capabilities.
Looking for a customized finish? Fabricate your own lid (paired with the Trim Kit) to match your application for a flawless and cohesive aesthetic.
Note: Custom lids are not provided
