

TUCK™

INTENTIONAL DESIGN IN
EVERY POWER SOLUTION.

TUCK™

STU
DIO

BY DEKKO

Forged From Design + Function

**POWER AND CHARGING LIKE YOU'VE
NEVER SEEN BEFORE.**

Tuck™ a powerful and unique addition the Studio by Dekko portfolio. Its highly intentional design was created with a hybrid work style in mind. As a relocatable power tap, Tuck™ can be easily personalized to effortlessly integrate into virtually any space. With two AC Tamper Resistant Receptacles, one USB-A Charging Port, and one USB-C Power Delivery (PD) Charging Port, the Tuck™ delivers a one-stop charging experience.

This power solution ensures all of your devices are charged quickly and safely, including laptops, smartphones, and tablets. Tuck™ is ideal for use around the home, within workspaces, integrated into collaborative areas, and so much more.

TUCK™ PROVIDES:**Relocatable Power**

Power where you need it, when you need it. Classified as a relocatable power solution, Tuck™ can be used in a variety of different ways, including freestanding or undermount capacity.

Power-Delivery (PD) Technology

Power Delivery technology works to ensure that the USB-C Power Delivery (PD) port delivers the right amount of power required to charge the connected device as fast and as safely as possible without damaging the battery. This is a very important feature in today's power products because it keeps people efficiently powered and effectively connected.

Enhanced Details

Tuck™ showcases thoughtfully designed details including a braided cord with an integrated leather cable manager loop, brass or silver metal accents, along with soft, sloping edges that spark innovation.
