 - » Includes Standard Weighted Base (Mounting Screws Not Included)
 - » Designed with 2 Separate Wire Channels
 - » Height: 51.181"
 - » Black, Silver, and White Finishes

Product descriptions & capabilities on following page...

HORIZONTAL & VERTICAL WIRE MANAGERS:

Cable Canal™

Constructed of powder coated steel, Cable Canal™ has two channel compartments to provide separation of power and data cabling for streamlined routing underneath the worksurface.

Cable Comber™

Mount horizontally to a modesty panel or to the underside of a work surface. Plastic channel hooks are slid into a 24" aluminum rail and end caps are used to secure the channel to the surface.

Cable Grip

Secure wires into the the unit's cavity without adhesives or accessories. This versatile unit can be installed in a variety of locations using only 4 screws.

Cable Channel™ & Cable Latch™

Allows users to easily add and remove wires and mount to the work surface with included adhesive-backing. Easily feed a collection of wires and cords through Cable Channel's large open passage. Cable Latch's flexible design offers secure wire management because of its unique clasp-lock mechanism.

Table Trough

This no-nonsense table trough kit conceals and stores the bulk of desktop wires and cords to the underside of the surface within its horizontal channel. Each kit includes 5 trough components which interlock together to create a max length of 40". Clip as little or as many components needed to extend the run of your desired length. Combine with the vertical Snake wire manager for a comprehensive cable management system.

Cable Clips

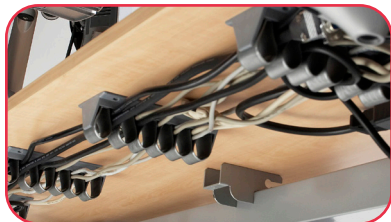

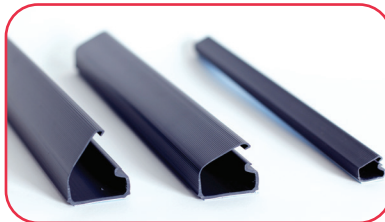

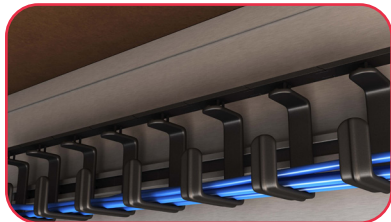

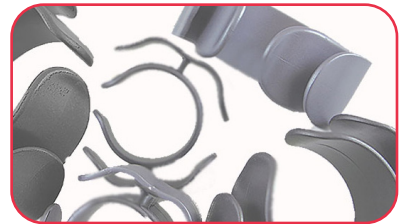

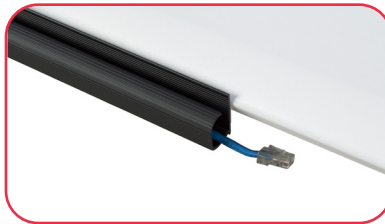

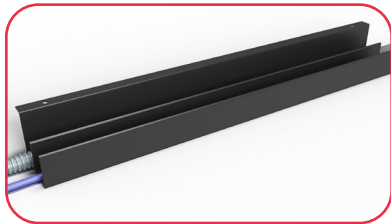

With no installation hardware required, Cable Clips simply snap on to the table leg and can house both electrical and data cables and be easily adjusted and re-adjusted by the user.

Slinky

The Slinky's flexible coil design adds a stylish element to wire management. Protect and route cabling neatly from the floor to the workstation. This vertical unit is simple to install and easy to detach for reconfiguration.

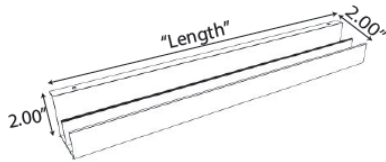

Snake

The Snake can be used on stationary and height-adjustable desks to completely hide and protect all wires within the unit. This highly flexible vertical wire manager comes complete with a top mounting plate and foot. Mounting screws not included.
